Office Action Summary	Application No. 10/681,977	Applicant(s) TSAUR, GARRY	
	Examiner Peter T deVore	Art Unit 3751	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Species 1, shown in Figure 1, of the reply filed on 2/11/05 is acknowledged. Because applicant did not distinctly and specifically point out the alleged errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Applicant states that claims 1-9 are readable thereon, and claims 10-15 are withdrawn from consideration. However, claims 4-9 each recite a hole at the piston or second end, a feature which does not appear on the Species 1 embodiment. Therefore, claims 4-15 are withdrawn from consideration as being drawn to a non-elected species.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Langhjelm.

The Langhjelm reference discloses an applicator comprising a housing 34, a piston 28, and tip with opening means 52.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Langhjelm in view of Zakensberk.

The Langhjelm reference discloses an applicator as discussed supra, but does not disclose a fracture line. However, the Zakensberk reference discloses a similar applicator including a fracture line 20 for fast opening of the applicator. It would have been obvious to modify the Langhjelm applicator to employ a fracture line in view of Zakensberg for fast opening of the container.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Langhjelm in view of Dombroski.

The Langhjelm reference discloses an applicator as discussed supra, but does not disclose that the tip is a rigid material defining a hole covered with a film. However, the Dombroski reference discloses a similar applicator including a rigid tip 30 defining a hole covered with a film 38 for tamperproofing. It would have been obvious to modify the Langhjelm applicator to employ a tip including a rigid tip defining a hole covered with a film in view of Dombroski for tamperproofing.
